

ADELEKE GREGORY AJAYI

FULL-STACK DEVELOPER | AI PRODUCT BUILDER | CLOUD & DEVOPS

Barrie, Ontario • 705-717-2112 • adelekeajayi001@gmail.com

github.com/lekxid • linkedin.com/in/gregory-ajayi • gregforward.duckdns.org

PROFESSIONAL PROFILE

Developer building AI-assisted learning experiences, business web applications and cloud-backed services. Hands-on project experience spans Next.js, React, TypeScript, Python, Supabase, Linux, Docker and GitHub Actions. Brings practical troubleshooting, systems thinking and careful delivery to independent products and client work.

TECHNICAL SKILLS

Web & product: Next.js, React, TypeScript, JavaScript, HTML5, CSS3, responsive UI, accessibility basics

Backend & data: Python, Flask, REST APIs, Supabase, SQL, PostgreSQL, authentication, CRUD workflows

Cloud & delivery: Linux/Ubuntu, Docker, Docker Compose, Git, GitHub Actions, CI/CD, Caddy, HTTPS, DNS, Azure lab experience

Networking & tools: TCP/IP, Windows Server & Active Directory labs, Cisco Packet Tracer, Wireshark, VirtualBox

SELECTED DEVELOPMENT PROJECTS

Lervion | AI Learning & Productivity Platform | Independent product · in development

- Developing an AI-assisted workspace integrating the LAI learning assistant, JAVI voice-interaction experiments, smart notes and study workflows.
- Worked on frontend/backend integration, responsive product UI, learning tools, media workflows and task continuity; refining features through iterative testing.

Everest CHAI Gold | Wholesale E-commerce | Client project · pilot implementation

- Developed a responsive wholesale ordering platform for Everest Traders Inc. using Next.js, React, TypeScript, Tailwind CSS and Supabase.
- Built product and variant management, image workflows, authentication, cart/checkout foundations, inventory adjustments and configurable delivery/pickup tools.
- Validated catalog and checkout flows with local automated tests; payment and production email integrations remained pending.

GregForward | Cloud & Engineering Portfolio | Personal project · 2026

- Created a responsive portfolio with technical case studies, accessible navigation and automated GitHub Pages publishing with HTTPS.
- Documented Azure/Ubuntu, Docker, Caddy, Flask, PostgreSQL, WireGuard and CI/CD lab architecture; separated verified live status from planned infrastructure.

PROFESSIONAL EXPERIENCE

Package Handler — Intelcom | Barrie, ON | Sep 2025 – Present

- Process, scan and sort parcels accurately while following safety procedures and time-sensitive operational workflows; recognized as Package Handler of the Month in 2026.

Quality Inspector — Honda | Ontario | Aug 2025 – Jan 2026

- Inspected components for quality issues, documented discrepancies and supported consistent production standards in a fast-paced environment.

EDUCATION

Big Data Analytics — Postgraduate Program | Georgian College | Completed Dec 2025

Computer Systems Technician — Networking | Georgian College | Program in progress; expected 2027

Bachelor of Technology — Accounting, Second Class Upper | Ladoke Akintola University of Technology
